POWER CONSUMPTION OF FRYERS

All machines will have automatic thermostat, when it reaches temperature, machine will cut off.
When temperature goes down it will start again
So it will On and off automatically.
So electrical consumption depends on usage of machine
The below example of 81 fryer...
if machine runs continuous and don't stop by temperature control its just for a idea.

Example of power bill of 81 fryer

81 Fryer 2000 watts=2kw
1 hour usage- 2 units electricity
10 hours usage -10hours x 2units =20 units
30 days of usage - 20units x 30 Days=600 units
Total power bill is 600units x Rs10 = **Rs 6000**

Rs 6000 is when machine is not stopped for 30 days and 10 hours a day,
But machine stops automatic, considering half time run of machine with thermostat will be **Rs 3000** approx per month
Considering 1/4 run time in 30 days will be **Rs1500** approx per month
The above is just to understand calculations the real situation will differ .

THE BELOW CALCULATION IF MACHINE ON FOR ONE HOUR WITHOUT THERMOSTAT STOPPING

LOW COST / CHEAP

Model: 81
2000 watts
1 hour usage 2 units
electricity

electricity

POWER CONSUMPTION OF FRYERS

PREMIUM STANDING ELECTRIC FRYERS

Model: FR 120 (2tank)
9000 watts 220v
1 hour usage 9 units
electricity

Model: FR 120 (1tank)
9000 watts 220v
1 hour usage 9 units
electricity

Model: FR300 - 1
9000 watts 220v
1 hour usage 9 units
electricity

Model: DF26
9000 watts
1 hour usage
9 units
electricity

The real power consumption will be less depending on usage, as every fryer will have temperature controller.

As per above calculation, the thermostat don't stop at all in 1 hour Its just to know full load units consumption

END

**CALL 9848887467
WWW.COOLEXWORLD.NET**

All our gas fryers should use only low-pressure domestic gas regulators. (except the Toastmaster gas fryer)

ca
us
-e

Don't run any Electric fryer without oil inside or else heater will burn away in one minute.

General Points:

Buy fryer capacity depending on your business requirement.

In 5.5 Liter fryer (81, F01, Fr 70) we can fry 300 grms of Frozen french fries if we fry more than 300 grams time of fry will increase and it will take more oil.

In 20 Liter fryer (Fr125,) we can fry 750 to 1kg of Fried Chicken if we fry more than that time of fry will increase and it will take more oil.

Approximate fry timings to get an idea about fryer:

French Fries, Smilies, Veg nuggets - 3 to 4 minutes.

Chicken nuggets, Chicken pops - 4 minutes.

Burger Patty - 4 to 5 minutes

Fried Chicken

Chicken popcorn - 3minutes

Wings - 6minutes

Leg Pieces - 15 minutes

Let us know what you fry and your volume of sales so we can suitable fryer
